
LA26-002 – ALTERNATE ACCESS TO ASHBURTON STORAGE SHED

ATTENTION: Pilbara Ports staff and contractors

ISSUE DATE: 24/08/2026

ISSUED BY: Landside Operations Supervisor (Ashburton)

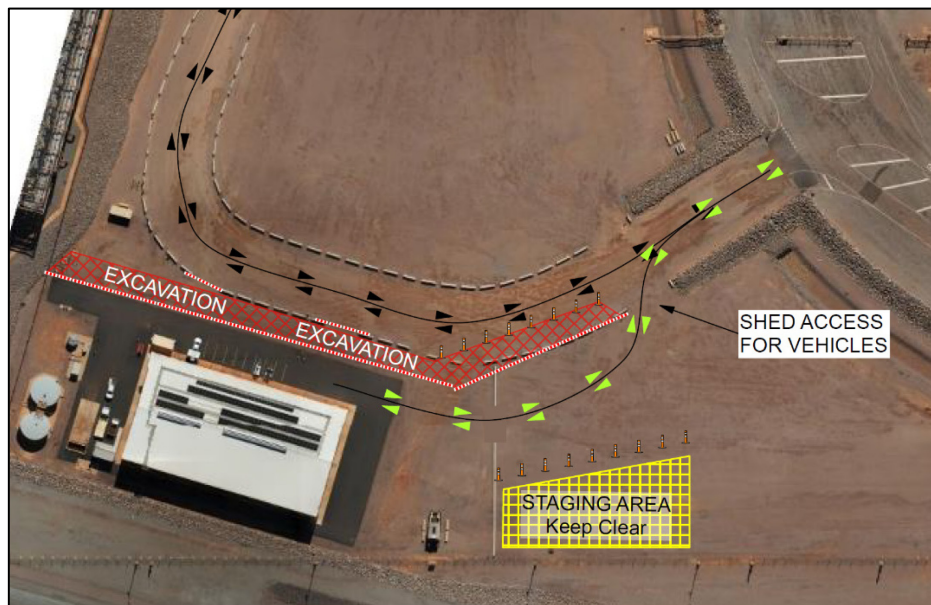

Pilbara Ports advises that, due to the commencement of excavation works associated with notice [LA26-001](#), direct vehicle access to the Ashburton Storage Shed is no longer available.

Vehicles requiring access to the Terminal Operations Store (oil spill response equipment) and Maintenance Workshop must utilise the alternative access route via the laydown area entrance, as shown on the attached traffic management plan. The excavation area is clearly delineated and must not be entered.

Operators should consider access requirements prior to arrival, particularly where heavy vehicles or oversized equipment are involved.

These arrangements are expected to remain in place for approximately four weeks, subject to construction progress.

All personnel must obey signage, traffic management controls and any directions provided by authorised personnel.

We appreciate your cooperation while these works are undertaken. Any queries regarding this notice should be directed to Landside Operations via the contact details below.
