Construction Activity – Link Bridge Waterside Construction Zone (Southwestern side of DCW-W) – Stage 1

Port users are advised that waterside construction activities are taking place on the southwestern side of DCW-W, as marked on the image below.

The works are currently being undertaken within the Stage 1 Construction Zone.

Bubble Curtain

A bubble curtain has been installed in the vicinity of the Southern Dolphin for environmental protection purposes. The approximate location and extent of the bubble curtain are indicated by the red dots on the image below. Red Norwegian floats are attached to additional weights along the bubble curtain and may move from the indicated locations with changes in tidal conditions.

Access Restrictions and Vessel Movements

All vessels intending to enter the Construction Zone must request and receive positive clearance from Dampier VTS prior to entry.
Vessels operating within or in the vicinity of the construction zone must exercise caution and comply with any directions issued by Dampier VTS.

Operational Awareness

Various construction activities, including diving, hot works, drilling and demolition, may occur simultaneously within the construction zone.
Vessels granted access must remain vigilant for ongoing construction activities and comply with all navigational and safety instructions issued by the contractor or the Port Authority.

Permit Requirements

Permits for diving or hot works within the Construction Zones must be obtained from the relevant project representative prior to commencing any such activities.
Dampier VTS must be notified on VHF Channel 11 prior to commencement and upon completion of diving or hot work activities.

Port users are reminded to exercise caution and maintain clear communication with the contractor/VTS when operating near or within the project area.
